

# Hello Callout!

## Overview of callouts

### Warning

Callouts provide a simple way to attract attention, for example, to this warning.

### This is Important (adding to an existing caption)

Danger, callouts will really improve your writing.

### Note

Note that there are five types of callouts, including: **note**, **tip**, **warning**, **caution**, and **important**.

### Tip With Caption (adding to an existing caption)

This is an example of a callout with a caption.

### Caption with **formatted** text, like `function_name()` (adding to an existing caption)

This is an example of a callout with a caption containing special formatting and characters.

### Expand To Learn About Collapse (adding to an existing caption)

This is an example of a ‘collapsed’ caution callout that can be expanded by the user. You can use `collapse="true"` to collapse it by default or `collapse="false"` to make a collapsible callout that is expanded by default.

Exercise (adding to an existing caption)

You can also use a plain `callout` class to get a simple callout treatment.
